

# Test cases & Zephyr

## Theme description

Write test cases based on the theme and test cases defined in Course 3. Practice the use of Zephyr and the full workflow of test case creation by applying best practices like:

- ❖ Each test case should have an expected result
- ❖ Test data should be provided (where available and/or possible)

## What you'll learn

- ❖ Understand the full workflow of test case creation
- ❖ Apply some best practices in test case creation

## Test case requirements

To have alignment in topics covered, focus the test case creation on the following:

- ❖ Validate the **Education** field
- ❖ Validate the **Date of birth** field
- ❖ Validate the **Password** field
- ❖ Validate the **Name** field
- ❖ Validate the **Phone** field
- ❖ Validate the **Submit** button
